

Featuring advanced security using

iSure™ Biometric Authentication Software

- **Provides advanced security for wireless transfers**
- **iSure™ middleware works in a Windows NT/Windows 2000 environment with LAN and WAN networks as well as RF, CDPD and Wireless Ethernet**
- **iSure™ automates biometric encryption of documents by storing and transmitting them by using a key based on the document owner's fingerprint**
- **iSure™ automates the biometric encryption and transfer of other file formats**
- **iSure™ encrypts and protects your electronic signature so it can only be attached to documents you create**
- **iSure™ validates the sender of a wireless transfer**

iSure™ - Peace of Mind for users of Wireless Technology

Integrated Technology Solutions (ITSI) is a full service Information Technology Company specializing in life cycle support for systems integration and biometric security solutions. The Biometric Authentication capability included in iSure™ was developed in partnership with the National Institute of Justice to further wireless security for law enforcement and public safety agencies. For more information about our IT services, iSure™, or our other security and disaster recovery capabilities, please visit our web site at www.itsi-inc.com or contact:
